

BetterMAN[®]

The 3-in-1 Formula Every Man Needs –
Better **BLADDER**, Better **PROSTATE**, and Better **STAMINA**!

Bladder control and nighttime urination problems are natural.

Living with them... isn't.

No matter what you've been told, you don't have to live with increased nighttime urination, decreased bladder control, and diminished energy levels and sexual stamina. While these problems can happen to men of any age, men over 50 suffer in greater numbers. Some men may also experience difficulty with urinary control after prostate surgery. Based on Traditional Chinese Medicine (TCM) theory, these seemingly unrelated issues are all connected, and in many cases related to the aging process.

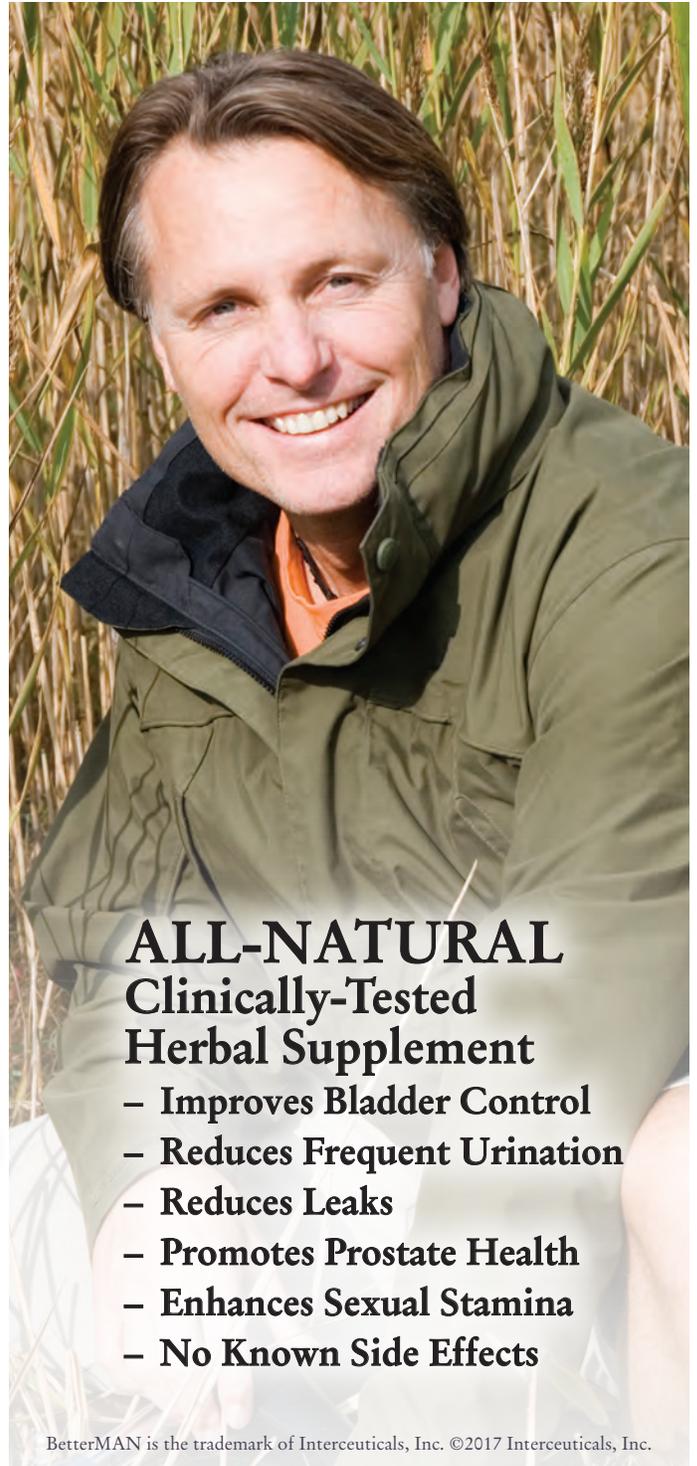

If you're tired of the mixed results and the side effects of other treatment options, it's time to give BetterMAN a try. You will be pleasantly surprised.

What is BetterMAN?

BetterMAN is a clinically tested, proprietary blend of 18 pure and all natural Chinese herbs. It was developed based on TCM theory and backed by years of scientific and clinical supporting data and quality assurance.

BetterMAN is for any man who wishes to increase bladder control and be spared from frequent nighttime trips to the bathroom. The result is the restful sleep and the control you deserve. BetterMAN is also for men of any age who desire a healthy prostate, improved energy levels, and sexual stamina.

How Do I Know BetterMAN Really Works?

We have thousands of satisfied customers who tell us how BetterMAN has changed their lives, helping them sleep better through the night, enhanced their self confidence and returned them to their full and renewed lives.

BetterMAN has been clinically and scientifically tested.* In a study of 5,000 men over a ten-year period, 75 percent of participants showed improved bladder control and reduced urinary frequency. In another study with 230 BetterMAN users, over 90 percent of the men reported improvements in urinary/bladder control and prostate health. The majority of men also reported significant improvement in sexual function.

You can regain bladder control and reduce frequency naturally

Without the Side Effects of Expensive Medications

Unlike Western medicine, which often requires you to take a different medication for each symptom, Traditional Chinese Medicine (TCM) takes a broader, more systematic approach to increase bladder control.

We know that bladder control and frequent urination issues are often a natural part of aging related to weakened muscle systems and poor circulation. Using the principles of TCM theory, BetterMAN strengthens your muscles by enhancing blood circulation, modulating neuromuscular functions, and balancing hormones naturally. By doing so, BetterMAN ensures that men have the strong muscle tone needed for better bladder and urinary control.

At the same time, by improving blood circulation and balancing testosterone levels, BetterMAN naturally enhances erectile function, energy levels and sexual stamina.

Since BetterMAN uses proven natural ingredients, there are no known side effects like those often accompanying prescription medications. In recent studies of men and women using common prescription incontinence medicines, researchers observed that some participants suffered from severe dry mouth, constipation, blurred vision, and even memory loss. With BetterMAN, there are no such worries.

COMPANY PHILOSOPHY
