Interceuticals®

Better Memory® Brain Supplement*

As we are living longer than any previous generation it becomes even more important to protect our memory and cognitive functions to ensure our quality of life as we age.*

The cutting-edge brain research finds that cognitive decline or mild cognitive impairment (MCI) with normal aging is closely associated with inflammation in the brain. While normal inflammation protects us, chronic inflammation may damage brain neurons, memory, and cognitive capabilities.*

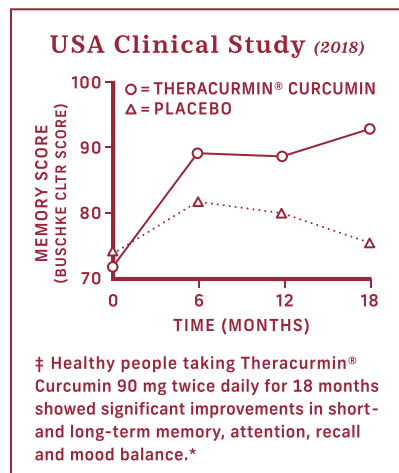

This is where Interceuticals Better Memory, a tested brain supplement, can help to support your cognitive health.*

The Science and Uniqueness of Interceuticals Better Memory®

Curcumin is a natural powerhouse in the fight against aging-related memory decline, but *it must be delivered in a very specific way in order for the body to use it effectively.* Thanks to a process called “nanotechnology,” the curcumin in Better Memory Theracurmin® Curcumin is absorbed into the blood at a concentration **27X** higher than competing products! That means **faster absorption** and a **significantly better effect** on memory and brain function as shown in USA Study.*

Better Memory uses the exact dosage, regimen, and strength proven effective in the USA Study, plus a time-tested Chinese herbal blend to improve brain blood flow for better results.

BETTER MEMORY BENEFITS

- Better Short- & Long-Term Memory*
- Better Recall and Clarity*
- Better Attention and Focus*
- Better Mood Balance*
- Use with Better Memory PM for faster results*

Real People, Real Concerns, and Real Results with Better Memory

Mike E. (76), Family Therapist— “I have always had a poor memory for faces and names. For the past 15 years, I have conducted training sessions for psychotherapists. Typically I remember the names of 5-6 of the 33 students. After using the **Better Memory Combo** for about 4 months, I remembered 17 names. Wow! That was significant.”*

Marianna M. (60), CEO— “Due to menopause, I haven’t felt sharp in the morning. With the **Better Memory Combo** I have no more brain-fog! They help me to feel more clarity, focused, and better mood.”*

David G. (70), Writer— “With a family history of neurological issues, including Alzheimer’s and Parkinson’s, I started taking the **Better Memory Combo** for preventative reasons. After 5-6 months, I have more confidence in the way my mind is working and my ability to recall things. I am more in tune with what’s going on, and less anxious about my mind deteriorating.”*

David D.— “My father (85) lives independently in an assisted living and he gave up his driver’s license 2 years ago. I think he is a bit sharper after taking the **Better Memory Combo** for 3 months. Before he was struggling just to keep track of events for the day, now he is looking at his calendar and calls me to ask meaningful questions about the future events that he does not recognize.”*
